INDUSTRY

Manufacturing

Overview

For nearly 75 years, Owens Corning has led virtually every major technological advance in glass fiber technology and is known as the world's largest manufacturer of fiberglass and related products. Through the years, Owens Corning innovations have ranged from military applications during World War II and the Fiberglas™-reinforced 1954 Chevrolet Corvette to the manufacturer of materials for Apollo space suits and insulation of the Trans-Alaskan pipeline.

Project Summary Highlights – Web Design & Development

- Engaging Customer Design
- Custom Responsive Design Layouts for Mobile Devices
- Franchise Finder
- Integrated You Tube channel video gallery
